

5 Easy Steps to Getting Started with Otus

STEP ONE

Kickoff Call

Connect with your dedicated Otus support team to discuss personalized goals and create a detailed implementation plan to ensure a smooth experience.

STEP TWO

Roster Your Staff & Students

Otus integrates directly with your Student Information System (SIS) to ensure that students, classes, teachers, and rosters appear in our platform without any additional work on your end.

STEP THREE

Identify Key Student Demographics for Custom Reports

Identify student demographics and groups you will use to visualize and disaggregate data, such as race/ethnicity, grade level, gender, special education status, English language learner and more.

STEP FOUR

Visualize Student Data From Third-Party Sources

Let the Otus team handle all of your district's data uploads, from state to national and local assessments, so you can focus on analyzing trends and acting on data to support student growth.

STEP FIVE

Participate in Ongoing Otus Training

The Otus team will curate a custom professional development plan that includes virtual and/or on-site learning opportunities to meet the needs of all educators in your community.
